Professional Summary

Computer Engineering graduate specializing in AI/ML, NLP, and product development. Co-founder and developer of award-winning solutions including MindBridge, an inclusive learning platform for dyslexic children, MindGuard, a digital mental health platform, and NepText, a Nepali language assistance extension. Winner of ICT Awards 2025 Rising Star Innovation and multiple national hackathons.

Technical Skills

Languages: Python, Rust, Dart, JavaScript, C/C++, SQL

ML/NLP: PyTorch, TensorFlow, OpenCV, Transformers, Language Modeling

Development: Flutter, Firebase, Supabase, Hive, PostgreSQL, REST APIs, JWT, OAuth2

Tools: Git, Docker, Linux, GitHub Actions

Selected Projects

MindBridge — Inclusive Learning Platform for Dyslexic Children [Demo](#)

- Co-founded, Designed and developed an AI-powered learning platform for dyslexic children using adaptive learning techniques.
- Built accessibility-focused educational modules to improve reading and comprehension support.
- Integrated AI-driven personalization for learning assistance and engagement.
- Winner of ICT Awards 2025 (Rising Star Innovation) and multiple national innovation competitions.

MindGuard — Digital Mental Health Platform for PTSD Care [Demo](#)

- Co-founded and developed a digital platform for PTSD screening, symptom monitoring, and clinician-supported patient management.
- Engineered a scalable data collection pipeline for capturing patient-reported mental health indicators and longitudinal outcomes.
- Developed interactive therapeutic modules inspired by cognitive behavioral therapy (CBT), mindfulness practices, and stress-reduction techniques.
- Designed clinician-facing workflows for monitoring symptom progression and treatment effectiveness.
- Recognized through multiple national innovation and startup competitions.

NepText — Nepali Language Assistance Extension [Demo](#)

- Developed a browser extension providing Nepali spelling correction, word prediction, and writing assistance.
- Implemented contextual text enhancement using machine learning techniques.

- Focused on improving digital writing experience for Nepali users.

Research Experience

- Developed machine learning models for suspicious transaction detection; recognized by Global IME Bank.
- Researched transformer-based approaches for Nepali NLP and low-resource language understanding.

Leadership & Entrepreneurship

Campus Director — Hult Prize IOEPC 2024–2025

- Led campus-wide entrepreneurship and innovation initiatives.
- Managed sponsorships, partnerships, and event coordination.

Technical Manager — Hult Prize IOEPC 2023–2024

- Managed technical infrastructure and digital platforms.
- Automated workflows supporting competition operations.

Awards & Achievements

- ICT Awards 2025 Rising Star Innovation Winner
- DeerHack 2025 Winner (Open Innovation)
- Hack-a-Week 2025 Winner (EdTech)
- Hacks for Nepal 2025 Winner
- Birat Trade Expo Idea Studio 2026 Winner
- Vision Koshi Startup Hackathon 2025 Second Runner-Up
- Global IME Bank Research Recognition

Education

Bachelor of Computer Engineering
IOEPC, Tribhuvan University
